

Coronavirus Panel

Comprehensive panel designed to detect the most prevalent coronavirus strains, including COVID-19, by molecular technique.

Those patients affected by coronavirus will be experiencing some of the following symptoms:

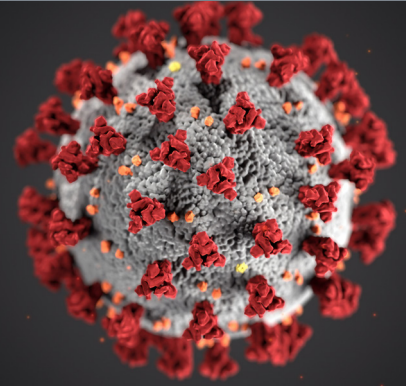

- Fever
- Cough
- Shortness of breath or difficulty breathing

Now you can provide patients with the quickest and most accurate diagnosis possible:

- Expedited patient results
- Multiple pathogens available
- Unmatched accuracy of PCR
- Simple collection
- Direct access to experience scientific staff
- Personal customer service experience

Coronavirus Panel

As a high-complexity CLIA accredited laboratory, we assist clinicians and health care providers to quickly identify the pathogens and underlying causes of disease.

We know better patient outcomes are achieved through fast, accurate, and reliable laboratory results.

Pathogens Detected

- Coronavirus 229E
- Coronavirus HKU1
- Coronavirus NL63
- Coronavirus OC43
- Coronavirus COVID-19
- Endogenous Control
